Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 6-24, 26-30, 34-67 and 71, drawn to simultaneous display of identifiers with content elements of records, classified in class 715, subclass 526.
- II. Claims 5, 25, 31-33 and 68-70, drawn to displaying records responsive to a database query conducted and responsive to a prior search request, classified in class 707, subclass 5.
- III. Claims 72 and 73, drawn to analyzing a list of records by sorting, classified in class 707, subclass 7.

The inventions are distinct, each from the other because of the following reasons:

The inventions Groups I, II and III are unrelated. The inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are classified separately.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

Art Unit: 2177

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
